The MAILING DATE of this communication appe	ears on the cover sheet with the c	orrespondence add	ress				
THE REPLY FILED 02 June 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.							
PERIOD FOR RE	PERIOD FOR REPLY [check either a) or b)]						
a) The period for reply expiresmonths from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if							
timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.							
2. \square The proposed amendment(s) will not be entered be	ecause:						
(a) they raise new issues that would require further	er consideration and/or search (s	see NOTE below);					
(b) they raise the issue of new matter (see Note below);							
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or							
(d) they present additional claims without canceling a corresponding number of finally rejected claims.							
NOTE:							
3. Applicant's reply has overcome the following reject	ion(s):						
4. Newly proposed or amended claim(s) would canceling the non-allowable claim(s).	be allowable if submitted in a se	eparate, timely filed a	amendment

Continuation of 5, does NOT place the application in condition for allowance because: Turley does teach that the second operating mode indication, the granularity bit (G), establishes a default address size. The G-bit determines whether the address size is measured in 1 byts of 4096 bytes. This is the value of the default offset address size. It determines how large the default offset address is.

In response to Applicant's disagreement with the alleged admission that "Applicants admit in their argument that there is an enable indication for the default address size" in the last sentence of item 9 in the Office Action, Applicant's remark on page 5 in the last paragraph:

"Of the remaining information in Turley's segment descriptor, only the D bit appears to have anything to do with default address size (see Turley, page 52, paragraph 2). Turley only discusses the D bit as describing the default operand size, but Applicants believe that the 80386 uses the D bit for both address size and operand size (see e.g. Intel, page 11-13, pragraph 3). The D bit is described at page 3, paragraph 3 as well...."

Applicants have admitted that the D bit, or enable indication, deals with the default address size.
